Education

Partido State University — **Goa, Camarines Sur**
Bachelor of Science in Information Technology, Cum Laude. GWA 1.45 — June 2026
Capstone: Paratanom: An Augmented Reality 2D Farming Top-down Singleplayer Game for Agricultural Education
Honors: Consistent Dean's Lister; Best Paper 2025; Research Exhibit Winner 2026; NaSRIC Best Presenter 2026; 3rd Place, Game Fest 2025; 5th Place, Ateneo de Naga Programming Challenge 2023
Relevant Coursework: System Design, Application Testing, Game Development, Augmented Reality Development

Experience

Freelance — **Camarines Sur**
Full-Stack Developer — **2026 – Present**

- Build a rental management web app for a gown-rental boutique (React + Vite, Express API on Render, MongoDB Atlas) with multi-item bookings, a rentals dashboard, and an availability calendar that prevents double-booking, replacing a handwritten ledger
- Develop JVCM Songbook, a song library and chord-chart web app for a church worship band, structured as a client/server monorepo with offline viewing and per-section band notes
- Design and build showcase websites for a church ministry, an event-decoration business, and a creative brand client using React and Tailwind CSS

Infotech Development Systems Colleges, Inc. (IDSC) — **Ligao, Albay**
College Instructor — **2026 – Present**

- Teach BSIT courses in Systems Integration & Architecture, Integrative Programming & Technologies 2, and Data Structures & Algorithms
- Design lecture materials, laboratory work, rubrics, and examinations; manage coursework and grading through Google Classroom
- Developed a pageant tabulation system for school events that automates judges' score computation and candidate ranking

Museo de Isarog — **Goa, Camarines Sur**
Information Technology Intern — **January 2026 – April 2026**

- Implemented Saray, an open-source desktop app (Vue, Tauri, TypeScript) that automates artifact cataloging and document generation, shipped with auto-updating releases
- Engineered a centralized museum artifact repository using the MERN stack (MongoDB, Express, React, Node.js)
- Designed and deployed a static landing page using React and Tailwind CSS to improve the museum's digital presence
- Served as a featured speaker for the Digital Preservation Balongibog Talks on technical strategies for cultural heritage conservation

Projects

K.Y.S. Password Manager — **Personal Project**

- Built a password manager for securely storing, organizing, and retrieving account credentials

Paratanom (Capstone) — **June 2025 – April 2026**
Lead Developer · Unity, C#, Blender

- Led a development team to deliver an award-winning AR educational farming game on schedule
- Trained a custom YOLOv8n object-detection model and integrated neural network inference within Unity to power real-time AR interactions

Leadership & Activities

Partido State University — **Goa, Camarines Sur**
Resource Speaker, BSIT Seminar — **2026**

- Delivered "Future-Ready IT: Emerging Technologies, AI, and the Skills for Tomorrow," including live demonstrations of AI-assisted development

Panday-Kabatiran 2026 – Research Presenter

Skills & Interests

Technical: TypeScript, JavaScript, Python, C#, C++, SQL; React, Vue, Vite, Tailwind CSS; Node.js, Express, REST APIs, Tauri; MongoDB / MongoDB Atlas; Git, Netlify, Render, Tailscale, ngrok; Unity, Figma
Language: English (Fluent), Tagalog (Native), Bicolano (Native)
Interests: Machine Learning, System Development, Automation Scripting, Music Theory, Philosophy
